

## CONTENTS

Volume 178, no. 1 and no. 2

<b>C. Benson, J. Jenkins, R.L. Lipsman and G. Ratcliff</b> , A geometric criterion for Gelfand pairs associated with the Heisenberg group .....	1
<b>Richard C. Bradley</b> , A “coboundary” theorem for sums of random variables taking their values in a Banach space .....	201
<b>Doug Bullock</b> , On the Kauffman bracket skein module of surgery on a trefoil .....	37
<b>Roger Chen</b> , Gap estimates of Schrödinger operator .....	225
<b>H.D. Fegan</b> , Regularity of convolution operators .....	53
<b>L. Grunenfelder, R. Guralnick, T. Košir and H. Radjavi</b> , Permutability of characters on algebras .....	63
<b>Daniel J. Heath</b> , On classification of Heegaard splittings and triangulations .....	241
<b>Bei Hu and Hong-Ming Yin</b> , The DeGiorgi-Nash-Moser type of estimate for parabolic Volterra integrodifferential equations .....	265
<b>Takeshi Isobe</b> , Optimal regularity of harmonic maps from a Riemannian manifold into a static Lorentzian manifold .....	71
<b>Hyeonbae Kang and Hyungwoon Koo</b> , Carleson measure characterizations of BMOA on pseudoconvex domains .....	279
<b>Hideki Kosaki and Takashi Sano</b> , Non-splitting inclusions of factors of type $III_0$ .....	95
<b>Ramanujachary Kumanduri</b> , Distinguished representations for unitary groups .....	293
<b>Abdallah Lyzzaik</b> , Covering theorems for open continuous mappings having two valences between orientable surfaces .....	307
<b>Thomas Plavchak</b> , A Polyhedral transversality theorem for one-parameter fixed point theory .....	127
<b>A. Prabhakar Rao</b> , Mathematical instantons with maximal order jumping lines .....	331

**Antonio Ros and Rabah Souam**, On stability of capillary surfaces in a ball..... 345

**Alexander Stanoyevitch and David A. Stegenga**, Equivalence of analytic and Sobolev Poincaré inequalities for planar domains ..... 363

**Phillip Thurber**, Semi-localization of a one pointed Kan complex ..... 147

**Jiaping Wang**, Global heat kernel estimates ..... 377

**Lianmin Zhou**, On stability of a catenoidal liquid bridge ..... 185
