

## CONTENTS

Volume 184, no. 1 and no. 2

<b>Andrea D’Agnolo and Francesco Tonin</b> , Cauchy problem for hyperbolic $\mathcal{D}$ -modules with regular singularities .....	1
<b>Lluís Alsedà, Jaume Llibre and Michał Misiurewicz</b> , Badly ordered cycles of circle maps .....	23
<b>Mats Andersson</b> , A Carleson estimate for the complex Monge–Ampère operator .....	201
<b>Joan C. Artés, Branko Grünbaum and Jaume Llibre</b> , On the number of invariant straight lines for polynomial differential systems .....	207
<b>Al Boggess, Laura Ann Glenn and Alexander Nagel</b> , Model rigid CR submanifolds of CR dimension 1 .....	43
<b>Dragomir Ž. Đoković</b> , Explicit Cayley triples in real forms of $G_2$ , $F_4$ , and $E_6$ .....	231
<b>Allan P. Donsig</b> , Dilations of limit algebras and interpolating spectrum ..	75
<b>Ichiro Fujimoto</b> , A Gelfand-Naimark theorem for $C^*$ -algebras .....	95
<b>Niels Grønbæk</b> , An imprimitivity theorem for representations of locally compact groups on arbitrary Banach spaces .....	121
<b>Po-Hsun Hsieh</b> , Canonical Almost Hermitian Structures of Normal Bundles and Applications to Kähler Forms .....	257
<b>A.V. Isaev and S.G. Krantz</b> , Hyperbolic Reinhardt domains in $\mathbb{C}^2$ with noncompact automorphism group .....	149
<b>Zhiren Jin and Kirk Lancaster</b> , A Comparison Principle for Quasilinear Elliptic Equations and Its Application .....	279
<b>Alex Kumjian, David Pask and Iain Raeburn</b> , Cuntz-Krieger algebras of directed graphs .....	161
<b>Peide Liu, Eero Saksman and Hans-Olav Tylli</b> , Small composition operators on analytic vector-valued function spaces .....	295
<b>F.J. López, F. Martín and D. Rodríguez</b> , Complete minimal surfaces derived from Chen-Gackstatter genus two example .....	311

<b>Osamu Saeki and Kazuhiro Sakuma</b> , On special generic maps into $\mathbf{R}^3$ .	175
<b>Reinhard Schafnitzel</b> , $\text{II}_1$ -Subfactors associated with the $C^*$ -Tensor Category of a Finite Group .....	333
<b>Larry B. Schweitzer</b> , $C^\infty$ Functions on the Cantor Set, and a Smooth $m$ -convex Fréchet Subalgebra of $O_2$ .....	349
<b>Elinor Velasquez</b> , The uncertainty principle on Cayley graphs .....	367
<b>Bun Wong</b> , An application of Einstein Kahler metrics to proper holomorphic mappings between pseudoconvex domains .....	195
<b>Y.L. Xin</b> , Boundary Value Problem of Harmonic Maps into $\mathbb{C}\mathbb{P}^n$ and $\mathbb{Q}\mathbb{P}^n$ .	381
