

CONTENTS

Volume 194, no. 1 and no. 2

George Androulakis and Stamatis Dostoglou , Positivity results for the Yang-Mills-Higgs Hessian	1
T.H. Baker and P.J. Forrester , Isomorphisms of type A affine Hecke algebras and multivariable orthogonal polynomials	19
Dan Coman , The pluricomplex Green function with two poles of the unit ball of \mathbb{C}^n	257
Silvano Delladio , Differential geometry of generalized submanifolds	285
Shusen Ding , New weighted integral inequalities for differential forms in some domains	43
Dragomir Ž. Đoković , Explicit Cayley triples in real forms of E_8	57
H.D. Fegan and B. Steer , First order differential operators on a locally symmetric space	83
Massimo Ferrarotti, Elisabetta Fortuna and Les Wilson , Real algebraic varieties with prescribed tangent cones	315
Ronald Fintushel and Ronald J. Stern , Nonsymplectic 4-manifolds with one basic class	325
Michael Freedman, Hugh Howards and Ying-Qing Wu , Extension of incompressible surfaces on the boundaries of 3-manifolds	335
Changfeng Gui and Juncheng Wei , On a sharp Moser-Aubin-Onofri inequality for functions on S^2 with symmetry	349
Hidetaka Hamada , Starlike mappings on bounded balanced domains with C^1 -plurisubharmonic defining functions	359
R. Hartshorne, M. Martin-Deschamps & D. Perrin , Construction de familles minimales de courbes gauches	97
Marc J. Jaffrey, Timothy L. Lance and Michael I. Stessin , Submodules of the Hardy space over polynomial algebras	373
Masashi Kobayashi , On the convexity of the Kobayashi metric on a taut complex manifold	117

Jimmie Lawson and Yongdo Lim , Lie semigroups with triple decompositions	393
Francisco J. López and Francisco Martín , A note on the Gauss map of complete nonorientable minimal surfaces	129
Barbara D. MacCluer , Commuting analytic self-maps of the ball	177
Jeffrey L. Meyer , Character analogues of Dedekind sums and transformations of analytic Eisenstein series	137
Kentaro Mikami , Godbillon-Vey classes of symplectic foliations	165
Alexei G. Poltoratski , Equivalence up to a rank one perturbation	175
Dipendra Prasad , Theta correspondence for unitary groups	427
Jie Qing , Ginzburg-Landau vortices and Mandelstam diagrams	189
Marco Rigoli, Maura Salvatori and Marco Vignati , A Liouville type theorem for a general class of operators on complete manifolds	439
Juhani Riihenta , Removable sets for subharmonic functions	199
Colin Rourke and Bert Wiest , Order automatic mapping class groups ..	209
Kevin P. Scannell , Infinitesimal deformations of some $SO(3, 1)$ lattices ...	455
Eva Suárez-Peiró , A Schläfli differential formula for simplices in semi-riemannian hyperquadrics, Gauss-Bonnet formulas for simplices in the de Sitter sphere and the dual volume of a hyperbolic simplex	229
Kouki Taniyama , Higher dimensional links in a simplicial complex embedded in a sphere	465
Thomas I. Vogel , Sufficient conditions for capillary surfaces to be energy minima	469
Jie Xiao , The Q_p corona theorem	491
