

CONTENTS

Dan Coman , The pluricomplex Green function with two poles of the unit ball of \mathbb{C}^n	257
Silvano Delladio , Differential geometry of generalized submanifolds	285
Massimo Ferrarotti, Elisabetta Fortuna and Les Wilson , Real algebraic varieties with prescribed tangent cones	315
Ronald Fintushel and Ronald J. Stern , Nonsymplectic 4-manifolds with one basic class	325
Michael Freedman, Hugh Howards and Ying-Qing Wu , Extension of incompressible surfaces on the boundaries of 3-manifolds	335
Changfeng Gui and Juncheng Wei , On a sharp Moser-Aubin-Onofri inequality for functions on S^2 with symmetry	349
Hidetaka Hamada , Starlike mappings on bounded balanced domains with C^1 -plurisubharmonic defining functions	359
Marc J. Jaffrey, Timothy L. Lance and Michael I. Stessin , Submodules of the Hardy space over polynomial algebras	373
Jimmie Lawson and Yongdo Lim , Lie semigroups with triple decompositions	393
Barbara D. MacCluer , Commuting analytic self-maps of the ball	413
Dipendra Prasad , Theta correspondence for unitary groups	427
Marco Rigoli, Maura Salvatori and Marco Vignati , A Liouville type theorem for a general class of operators on complete manifolds	439
Kevin P. Scannell , Infinitesimal deformations of some $SO(3, 1)$ lattices ...	455
Kouki Taniyama , Higher dimensional links in a simplicial complex embedded in a sphere	465
Thomas I. Vogel , Sufficient conditions for capillary surfaces to be energy minima	469
Jie Xiao , The Q_p corona theorem	491
