

## CONTENTS

Volume 206, no. 1 and no. 2

<b>E. Amar and C. Menini</b> , A counterexample to the corona theorem for operators on $H^2(\mathbb{D}^n)$ .....	257
<b>U.K. Anandavardhanan and R. Tandon</b> , On distinguishedness.....	269
<b>E. Ballico</b> , On the existence of special stable spanned vector bundles on projective curves.....	1
<b>Joseph Barback</b> , Hereditarily odd-even and combinatorial isols .....	9
<b>Pierre Baumann</b> , Canonical bases and the conjugating representation of a semisimple group .....	25
<b>Salem Ben Saïd</b> , Weighted Bergman spaces on bounded symmetric domains	39
<b>David P. Blecher, Edward G. Effros and Vrej Zarikian</b> , One-sided $M$ -ideals and multipliers in operator spaces, I.....	287
<b>R. Fiorese, A. Levrero and M.A. Lledó</b> , Algebraic and differential star products on regular orbits of compact Lie groups .....	321
<b>Viktor L. Ginzburg and Ely Kerman</b> , Periodic orbits of Hamiltonian flows near symplectic extrema .....	69
<b>Jean-François Grosjean</b> , Upper bounds for the first eigenvalue of the Laplacian on compact submanifolds .....	93
<b>Steve Hudson and Mark Leckband</b> , Extremals for a Moser-Jodeit exponential inequality .....	113
<b>Humio Ichimura</b> , On a quotient of the unramified Iwasawa module over an abelian number field, II.....	129
<b>Anthony C. Kable</b> , Legendre sums, Soto-Andrade sums and Kloosterman sums .....	139
<b>Jeffrey Lee and Ken Richardson</b> , Lichnerowicz and Obata theorems for foliations .....	339
<b>Rafael López</b> , Constant mean curvature graphs in a strip of $\mathbb{R}^2$ .....	359
<b>Francesco Mercuri, Paolo Piccione and Daniel V. Tausk</b> , Stability of the conjugate index, degenerate conjugate points and the Maslov index in semi-Riemannian geometry .....	375
<b>Koichi Nagano</b> , A sphere theorem for 2-dimensional CAT(1)-spaces .....	401
<b>Liviu I. Nicolaescu</b> , On the Cappell-Lee-Miller gluing theorem.....	159

<b>M.P. de Oliveira and J.A. Verderesi</b> , The product of exponentials in the definition of canonical kernel function.....	187
<b>Stefano Pigola, Marco Rigoli and Alberto G. Setti</b> , Some remarks on the prescribed mean curvature equation on complete manifolds.....	195
<b>Christian Pommerenke and Alexander Vasil'ev</b> , Angular derivatives of bounded univalent functions and extremal partitions of the unit disk.....	425
<b>A. Raghuram</b> , On representations of $p$ -adic $GL_2(\mathcal{D})$ .....	451
<b>Paul Seidel</b> , Symplectic Floer homology and the mapping class group.....	219
<b>Víctor F. Sirvent and Yang Wang</b> , Self-affine tiling via substitution dynamical systems and Rauzy fractals.....	465
<b>Thomas I. Vogel</b> , Local energy minimality of capillary surfaces in the presence of symmetry.....	487
<b>Hizuru Yamagishi</b> , On elliptic curves of rank four with three-division rational point.....	231
<b>Xiaohua Zhu</b> , Ricci curvature on the blow-up of $\mathbb{C}P^2$ at two points.....	245
