Volume 209, no. 1 and no. 2

Grégory Berhuy, Marina Monsurrò and Jean-Pierre Tignol , The discriminant of a symplectic involution	201
James Conant , Fusion and fission in graph complexes	219
Brian Curtin , Some planar algebras related to graphs	231
H.R. Dowson, M.B. Ghaemi and P.G. Spain , Boolean algebras of projections & algebras of spectral operators	1
B. Felzenszwalb, A. Giamb Bruno and G. Leal , On rings which are sums of two PI-subrings: A combinatorial approach	17
Ciprian Foiaş, Il Bong Jung, Eungil Ko and Carl Pearcy , Complete contractivity of maps associated with the Aluthge and Duggal transforms ...	249
Etienne Fouvry and Philippe Michel , Sommes de modules de sommes d'exponentielles	261
Glenn J. Fox , A method of Washington applied to the derivation of a two-variable p -adic L -function	31
David Helm and Ezra Miller , Bass numbers of semigroup-graded local cohomology	41
James A. Hoffman and Daniel Matignon , Examples of bireducible Dehn fillings	67
Jerzy Jezierski and Waław Marzantowicz , Homotopy minimal periods for maps of three dimensional nilmanifolds	85
Young-One Kim, Jungseob Lee and Kyewon K. Park , A zeta function for flip systems	289
Andrei K. Lerner , On some pointwise inequalities concerning tent spaces and sharp maximal functions	303
Zhi-Guo Liu , Some Eisenstein series identities related to modular equations of the seventh order	103
Charles Livingston , Observations on Lickorish knotting of contractible 4-manifolds	319
Harald Löwe , Sixteen-dimensional locally compact translation planes admitting $SL_2\mathbb{H}$ as a group of collineations	325

Matthew Neal and Bernard Russo , Operator space characterizations of C^* -algebras and ternary rings.....	339
J.C. Rosales and M.B. Branco , Irreducible numerical semigroups.....	131
Sylvie Ruelle , On the Vere-Jones classification and existence of maximal measures for countable topological Markov chains.....	365
Michael Taylor , The Schrödinger equation on spheres.....	145
Cynthia E. Will , The meromorphic continuation of the resolvent of the Laplacian on line bundles over $CH(n)$	157
Baozhong Yang , Removable singularities for Yang-Mills connections in higher dimensions.....	381
Fuliu Zhu , The heat kernel and the Riesz transforms on the quaternionic Heisenberg groups.....	175
