

CONTENTS

Grégory Berhuy, Marina Monsurrò and Jean-Pierre Tignol , The discriminant of a symplectic involution	201
James Conant , Fusion and fission in graph complexes	219
Brian Curtin , Some planar algebras related to graphs	231
Ciprian Foiaş, Il Bong Jung, Eungil Ko and Carl Percy , Complete contractivity of maps associated with the Aluthge and Duggal transforms ...	249
Etienne Fouvry and Philippe Michel , Sommes de modules de sommes d'exponentielles	261
Young-One Kim, Jungseob Lee and Kyewon K. Park , A zeta function for flip systems	289
Andrei K. Lerner , On some pointwise inequalities concerning tent spaces and sharp maximal functions	303
Charles Livingston , Observations on Lickorish knotting of contractible 4-manifolds	319
Harald Löwe , Sixteen-dimensional locally compact translation planes admitting $SL_2\mathbb{H}$ as a group of collineations	325
Matthew Neal and Bernard Russo , Operator space characterizations of C^* -algebras and ternary rings	339
Sylvie Ruette , On the Vere-Jones classification and existence of maximal measures for countable topological Markov chains	365
Baozhong Yang , Removable singularities for Yang-Mills connections in higher dimensions	381
