

CONTENTS

Volume 212, no. 1 and no. 2

Lidia Angeleri-Hügel , Endocoherent modules	1
Roger W. Barnard, Kent Pearce and Alexander Yu. Solynin , Area, width, and logarithmic capacity of convex sets	13
Rüdiger W. Braun, Reinhold Meise and B.A. Taylor , Perturbation of differential operators admitting a continuous linear right inverse on ultradistributions	25
Paola Cellini, Pierluigi Möseneder Frajria and Paolo Papi , Compatible discrete series	201
Qing-Ming Cheng , Compact hypersurfaces in a unit sphere with infinite fundamental group	49
Piotr T. Chruściel and Marc Herzlich , The mass of asymptotically hyperbolic Riemannian manifolds	231
A.V. Corro, W. Ferreira and K. Tenenblat , Ribaucour transformations for constant mean curvature and linear Weingarten surfaces	265
Michael Frank and Vern I. Paulsen , Injective envelopes of C^* -algebras as operator modules	57
Jordi Guàrdia , A family of arithmetic surfaces of genus 3	71
Lakhdar Hammoudi , Quotients of nilalgebras and their associated groups	93
Y.-S. Hwang, David B. Leep and Adrian R. Wadsworth , Galois groups of order $2n$ that contain a cyclic subgroup of order n	297
Matthew Leingang , Symmetric space valued moment maps	103
A. Lesfari , Le système différentiel de Hénon-Heiles et les variétés de Prym	125
Jean Ludwig, Salma Mint Elhacen and Carine Molitor-Braun , Characterization of the simple $L^1(G)$ -modules for exponential Lie groups	133
Gunter Malle , Explicit realization of the Dickson groups $G_2(q)$ as Galois groups	157
Francesca Mantese, Pavel Ruzicka and Alberto Tonolo , Cotilting versus pure-injective modules	321
Rafe Mazzeo and Frank Pacard , Poincaré-Einstein metrics and the Schouten tensor	169

Yoshihiro Mizuta and Tetsu Shimomura , Growth properties for modified Poisson integrals in a half space.....	333
Valério Ramos Batista , A family of triply periodic Costa surfaces.....	347
Joël Rouyer , On antipodes on a manifold endowed with a generic Riemannian metric.....	187
Minoru Yamamoto , Immersions of surfaces with boundary into the plane.	371
Tom Zerger , Contraction criteria for reducible rational curves with components of length one in smooth complex threefolds	377
Acknowledgements	395
Copyright form	397
