

CONTENTS

Volume 211, no. 1 and no. 2

Ehud Moshe Baruch , Bessel functions for $GL(3)$ over a p -adic field	1
S.T. Belinschi and H. Bercovici , A property of free entropy	35
Aslak Bakke Buan and Henning Krause , Cotilting modules over tame hereditary algebras	41
C.K. Cheung and Kang-Tae Kim , The constant curvature property of the Wu invariant metric	61
Mark Comerford , Conjugacy and counterexample in random iteration	69
Michael Goldberg , Matrix A_p weights via maximal functions	201
Debashish Goswami, J. Martin Lindsay, Kalyan B. Sinha and Stephen J. Wills , Dilation of Markovian cocycles on a von Neumann algebra	221
Emmanuel Hallouin and Emmanuel Riboulet-Deyris , Computation of some moduli spaces of covers and explicit \mathcal{S}_n and \mathcal{A}_n regular $\mathbb{Q}(T)$ -extensions with totally real fibers	81
Jeong Hee Hong and Wojciech Szymański , Quantum lens spaces and graph algebras	249
Zhiren Jin and Kirk Lancaster , A Phragmén-Lindelöf theorem and the behavior at infinity of solutions of non-hyperbolic equations	101
Kenley Jung , A free entropy dimension lemma	265
Masaharu Kaneda and Toshiki Nakashima , On certain maximal cyclic modules for the quantized special linear algebra at a root of unity	273
J.-M. Kantor and K.S. Sarkaria , On primitive subdivisions of an elementary tetrahedron	123
Thilo Kuessner , Efficient fundamental cycles of cusped hyperbolic manifolds	283
Fernando León-Saavedra and Antonio Piqueras-Lerena , Cyclic properties of Volterra operator	157
Joshua A. Leslie and Qingqi Yue , The vector bundle decomposition	315
Hung Yean Loke , Quaternionic representations of exceptional Lie groups .	341
Rachel J. Pries , Conductors of wildly ramified covers, III	163
Rudolf Scharlau and Lynne H. Walling , A weak multiplicity-one theorem for Siegel modular forms	369

Dimitri Shlyakhtenko , Free Fisher information for non-tracial states	375
Kouki Taniyama and Akira Yasuhara , Local moves on spatial graphs and finite type invariants	183
Brendan J. Weickert , Nonwandering, nonrecurrent Fatou components in \mathbf{P}^2	391
